Welcome home.

Your home isn't just the largest investment you'll probably ever make; it's also the most personal. Everybody likes to add their individual touch to their home and what better place to start than at the front door.

We've created ranges to match both your home and your desire for individuality. Whether you live in a town terrace or country cottage our blending of high performance materials and unique designs promises the best of both worlds.

With the choice of colours, woodgrain finishes, door styles, glazing options and accessories everything can be tailored and customised to suit your tastes.

There are literally thousands of combinations, so sit back and enjoy creating your Britdoors Group door, safe in the knowledge that quality, value, strength and security come as standard.

Any home. Not just any door.

If you've looked at other door brochures we'd forgive you for thinking that one door is much like the next. Naturally we'd beg to differ. So what makes a Britdoors Group door different? The answer is in our approach - we set out to make it easier for you to buy a better door in the first place and as we've been manufacturing doors for over 20 years that was the easy bit. Take a moment to read our quick features guide to ensure that all your needs are met. Choose a Britdoors Group door. Its the door your home deserves.

Experience

In safe hands.

With over 20 years experience and in excess 2 million doors supplied and fitted across the UK via our approved partners, you can trust us to supply exactly what you need.

Handmade

Made to measure or made to fit

We are proud to say that all our doors are bespoke and handmade in UK. Unlike most other manufactures we don't import prefabricated standard door blanks all the way from the Far East and simply cut and trim to fit. Each and every one of our doors are tailored and manufactured to suit your individual home.

Curb appeal

First impressions are everything

Our doors have been designed with unique patented processes that provide enhanced aesthetics that are instantly recognisable. Create the best first impression and ensure that your new door stands out from the crowds. Visit a showroom of one of our approved installers to see the difference for yourself.

Secured by Design

Official Police Security Initiative

Security

Keeping your home safe

In a controlled environment our doors are tested to destruction and put through all known break-in methods - and then some! With our Secure By Design (SBD) status and BSI accreditation you can relax knowing that your home and contents are safe with a Britdoor guarding the way.

Insulation

Saving your energy

Keeping heat in your home and money in the bank is paramount. The core material in our doors have been designed to achieve both high security and the best U-value insulation properties. Remember, your door insulation is just as important as your windows so check what core materials are being used.

Low Maintenance

Precious time

Just imagine that - your new door will never need painting or treating again to keep looking and performing like new. Our doors are designed and guaranteed to last at least 10 years and with simple annual care you can expect your door to last much longer - We've got a history dating back 20 years and over 2 million doors that proves it!

Environment care

Go green

The strict safety, environmental and waste disposal standards applied for UK based manufacturing ensures that our doors do everything possible to be a friend to the environment. You already know we don't ship door blanks all the way from the Far East; this means the only journey your door will make, will be from us to you, keeping the carbon footprint as low as possible.

Choice

Be individual

Choosing a Britdoors Group Door with our unique aesthetics already means that your door will stand out as something special. But like doors, not all homes are the same. Browse through this brochure to choose a door range and enjoying creating your own unique door from the endless combinations of styles, colours, furniture and locking options.

A range for everyone.

Offering what is probably the most comprehensive external composite door range, choosing your new door couldn't be made easier than with Britdoors Group.

Simply browse our ranges and you will always find a door to suit your home and individuality.

REGENCY

Timeless and understated

This most popular door style range with the unique patented flush glazing feature will never tire and look perfect on every home.

Script

Making a statement

From contemporary flush to the more traditional tongue and groove styles, the Script door range completes the choice spectrum ensuring you can create a door perfectly written for your home.

Classic

The best choice at the best price

Designed to meet the demands for rear or side entrances; the Classic keeps you protected. Whether needed in a busy family home or just occasional usage, there is something for everyone.

FireSafe

No compromise

Choice shouldn't be limited because Fire regulations need to be met. Our extensive range of fire rated doors means no compromise is needed between pleasing aesthetics and protection. Look for the firesafe symbol.

Timber

Something special

Our premium timber range manufactured by 120 year established JCK Joinery, offers almost limitless choice. Handcrafted from engineered timber composite to a fully bespoke joinery door, you decide.

Choosing your new door is simple!

Our easy-to-use online door designer tool lets you try combinations of ranges, door designs, colour options, glazing choices and optional door furniture. In simple steps you can design your own door and have it ready to order. It's that easy.

Visit www.britdoorsgroup.com/door-design

REGENCY

Timeless & Understated

These traditional styles combined with our unique and patented flush glazing feature look perfect on all UK homes and will never date or be out of fashion.

Regency Doors: Key Features Guide

Flush Glazing

Providing the very best aesthetics, this unique patented technology is instantly recognisable on all Regency doors. Flush glazing creates flawless slim lines without the use of cassettes, providing a better looking, more durable finish. Make your door the talk of the town!

Laminated internal frame

Built with strength in mind, the Regency's back bone is constructed from a cross laminated timber inner frame. This specially designed and selected material, provides the maximum rigidity and strength to counter twisting and warping.

Made to measure

Every door is bespoke and made to measure each time; never simply cut down to fit. This ensures that the inner frame strength is never weakened or compromised, providing retained consistent strength.

Crafted timber grain

Beauty is in the detail, that's why the Regency grain effect skin has been handcrafted from a real timber door, to provide the most authentic appearance. It looks just like a real timber door, but with all the properties of a composite.

Quality & durable finish

Complementing the uniquely crafted timber grain effect skin is a specially developed paint finish. Applied by the same process used by prestigious car manufacturers, the result gives the freshly painted new door look with long-lasting colour and maintenance free performance.

Striking colours

Our extensive door colour choices have been carefully developed and blended to deliver a unique sumptuous and rich finish colour that will ensure your door stands out from others.

Script

Making a Statement

Contemporary flush to more traditional tongue and groove door styles to make an individual statement.

Script Doors; Key Features Guide

Laminated internal frame

Built with strength in mind, the Script's back bone is constructed from a cross laminated timber inner frame. This specially designed and selected material, provides the maximum rigidity and strength to counter twisting and warping.

Crafted timber grain; enhanced with a modern or country cottage essence

Beauty is in the detail, that's why each of the Script grain effect skins have been handcrafted from a real timber door, to provide the most authentic appearance. Choose from either a flush grain finish for that modern and contemporary feel; or conversely Tongue and Groove to add a hint of country cottage panache.

Made to measure

Every door is bespoke and made to measure each time; never simply cut down to fit. This ensures that the inner frame strength is never weakened or compromised, providing retained consistent strength.

Quality & durable finish

Complementing the uniquely crafted timber grain effect is a specially developed paint finish. Applied by the same process used by prestigious car manufactures, the result gives the freshly painted new door look with long-lasting colour and maintenance free performance.

Classic

Combining classic styling with modern quality and durability.

Specially designed to meet the everyday demands and flexibility typically required of rear and side doors.

Classic Doors; Key Features Guide

Designed to perform

Rear and side doors are most often the busiest and most used in any home. We understand this and that is why our Classic door is built to perform; constructed with a full through coloured UV stable UPVC facing, making it stronger and more durable to take everyday usage.

Rear/side door extras

As a purpose built rear or side door, we've made sure that a selection of components are available to suit your lifestyle. This includes the option to incorporate a cat flap for a family pet or have an adjustable integral window blind for privacy.

Stable doors

Experience the fresh air and outdoor ambiance with peace of mind. Opting for a stable door means the top can open while the stop remains locked, thus keeping the family safe inside.

Crafted timber grain; enhanced with a modern or country cottage essence

Beauty is in the detail, that's why the Classic grain effect skin has been handcrafted from a real timber door, to provide the most authentic appearance. It looks just like a real timber door, but with all the properties of a composite.

Laminated internal frame

Built with strength in mind, the Classic's back bone is constructed from a cross laminated timber inner frame. This specially designed and selected material, provides the maximum rigidity and strength to counter twisting and warping.

Made to measure

Each door is bespoke and made to measure each time; never simply cut down to fit. This ensures that the inner frame strength is never weakened or compromised, providing retained consistent strength.

FireSafe 

FD30s and FD60s

An abundance of our door styles can be fire rated to combine great looks with durability, security and fire resistance.

Designed to perform.

Our complete offering of UK Manufactured fire doors are designed to perform. FireSafe combines stunning aesthetics with high performance, coupled with fire resistance. All of our ranges from composite fire doors to handcrafted timber doors meet relevant building and fire safety regulations.

We design and build our fire doors from our two UK manufacturing facilities – each door can be tailored to you specific style and requirements.

Fire door styles

Many of our bestselling composite door styles can be fire rated up to 30 minutes. Look for the fire symbol  throughout the brochure to see if that style can be fire rated.

Glazing

To meet fire regulations and standards, only standard glazing can be used; therefore no decorative glass is available.

FD60s Timber fire doors

For fire ratings of 60 minutes or above, contact us about our Timber range; JCK Joinery has been crafting fire doors for over 120 years and will keep you protected. Our timber range of fire doors include external and internal FD30 and FD60 ratings.

Timber

Handcrafted, bespoke timber doors

Our comprehensive range provides a style and design for every taste; whether traditional or modern, grand or understated you will find a door to suit.

Attain your vision, with British timber joinery doors.

Our Timber doors are manufactured by JCK Joinery, a well-established company since the 1830s and the founder member of the British Woodworking Federation. All our timber doors are handcrafted from start to finish in the UK and are PAS24:2012 Secured by Design certified.

JCK Joinery is a member of Britdoors Group and continues to command a reputation and drive for high quality solid timber doorsets, achieved through experience of excellent levels of customer service and outstanding products. JCK represents high-end, luxurious and bespoke top of the scale timber doors.

Traditional Doors

A superior range of traditional timber doors with raised and fielded panel designs.

Primary Range

A wide spectrum of familiar joinery door designs essential for many projects.

Modern Range

Using the finest engineered timber door cores to produce striking designs for both internal and external locations.

Eco-Lite Doors

The very latest in eco-friendly engineered 'Accoya' timber doors; a must for green build projects.

Heritage Oak

The finest Oak doors suitable for the most superior and stately of homes.

JCK Innovation

Innovative twists to standard designs, using traditional joinery.

Spirit Doors

With five ranges of contemporary styled design, this brand is an excellent choice for the high specification projects.

Request brochure

Talk to us about your timber door requirements and we will guide you to the best option for you.

Additional solutions for wider entrance spaces.

Frames and thresholds

The door frame is an important part of your doorset and we use strong, reinforced PVC-U frames for all our doors. This means the door and frame both work together to prevent draughts and to stop rainwater getting in.

Reinforced construction

Our door frames are made using 70mm PVC-U five chamber profile, fully reinforced and double sealed.

Great insulation

Frames provide good insulation and their rigidity ensures draughts are eliminated.

Choice of frame colours

We offer a choice of five frame colours to match your window frames and complement your doors.*

Thresholds

We provide three threshold options and four cill options to suit your needs and any specific survey requirements.

Thresholds

Low PVC

Trimline
'Part M' compliant

Lowline

Cills

Goal post strip

Stub Cill

150mm

180mm

Side Panels

Side panels are frames which sit either side of your door and are used if your property requires a wider fitted entrance space. They provide an attractive alternative to traditional side and top light window frames. They are handcrafted to match or complement your door.

Side & top lights

An attractive solution for wider entrances which also allows more natural light to shine into your home.

Our options for side panels and side and top lights include;

Glazed panels

You can have glazed side panels to match or complement the glazing already used on your Regency door. They are glazed using our unique FlushGlaze technology.

Solid panels

You could have solid panels with no glazing.

Mix and match

You can also mix and match your choice so that a solid front door can have a glazed side panel and vice versa.

* Please note that woodgrain stain doors are hand applied and as such will not exactly match a woodgrain frame.

Locking, Security and Handles

Enjoy the peace of mind that comes from knowing your new Britdoor will keep those unwanted visitors at bay.

In conjunction with industry respected hardware partners we have developed a comprehensive range of locking and handle choices.

Security is built in as standard with every lock option, so all you need to do is choose the locking and handle pack that best suits your needs, door style and home. Take a few moments to consider the options shown here.

Lock option: 3	Handle pack: 3A	Handle pack: 3B
